

# MULTIFUNÇÕES ELETROMECAÂNICA

ELEKTROMECHANISCHE MULTIFUNKTIONS SCHLÖSER | SERRURE MULTIFONCTIONS ELECTROMECHANIQUE | ELETROMECHANIC MULTIFUNCTION LOCK

## EM50

PROJETO EM DESENVOLVIMENTO | PROJECT IN DEVELOPEMENT | PROJET EN DEVELOPEMENT | ENTWICKLUNGSPROJEKT

### Características · Feature · Caractéristiques · Eigenschaften

Furos de Roseta  
Rosette holes  
Trous de rosaces  
Rosettenbohrungen

Reversível  
Non handed  
Réversible  
Beidseitig verwendbar

Função automática  
Automatic Function  
Fonction automatique  
Automatik-Funktion

Função antipânico  
Antipanic function  
Fonction antipanique  
Anti-Panik Funktion

Função de emergência  
Emergency function  
Fonction d'urgence  
Notfall Funktion

Função dia/noite  
Day/night function  
Fonction jour/nuit  
Tag/Nacht Funktion

Sistema anti-cartão  
Anti-card system  
Système anti-carton  
Sicherung gegen kartenöffnung

Topos redondos/quadrados  
Round/ Square frontplate  
Têteière bouts ronds/ carrés  
Eckige oder runde Stulpe

Trinco silencioso  
Silent latch bolt  
¼ Tour Silencieux  
Flüsterfalle

Chapa testa opcional  
Strike plate optional  
Gâche en option  
Schließblech optional

Acionamento elétrico 12/24V sem manipulação. Proteção contra picos e falhas de energia.  
Electric action 12/24V without manipulation. Surge and power failure protection.  
Actionnement Eléctrique 12/24V sans manipulation. Emission ou rupture.  
Elektrisch Antrieb 12/24V ohne Manipulation. Überspannungsschutz und Stromausfall.

### DATA AND FEATURES

	AM50CYL Mechanic	EM50CYL Electric
Non-handed	●	●
Automatic mechanical locking	●	●
Silent latch bolt	●	●
Emergency escape function	●	●
Antipanic function	●	●
Anti card hacking system	●	●
Two point locking	●	●
Mechanical sequential control	●	●
Access control lock	-	●
Automatic reset of the enable signal following non-effected door opening	-	●
Anti-tamper line	-	●
Adjustable lock/unlock time	-	●
Disable of the electric unlocking system via key use	-	●
External lever handle electrically activated/deactivated	-	●
Monitoring deadbolt operating points	-	●
Automatic disabling of the permanent-open function in case of power failure	-	○
Automatic unlock of both sides in case of power failure	-	○
Lock keeps its state in case of power failure	●	○

● yes

- no
